

ProDVX Stainless Steel Housing 10 inch

Installation Manual

ProDVX Stainless Steel Housing 10 inch

This instruction manual details the procedures to follow when installing the ProDVX Stainless Steel Housing for our 10-inch X-series and SLB-series devices. Before installing, make sure that all parts are included:

- Front plate
- Back plate
- M3x10 Screws (4x)

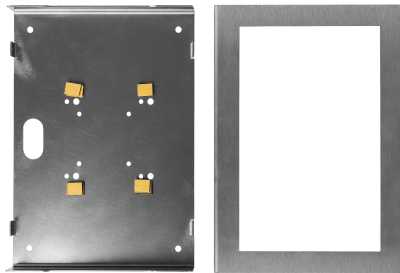

Please note that the hexagonal key required for installation is not included.

Hex key 2mm

(Not included)

M3x10 (4x)

1. Mounting the back plate

The back-plate can be mounted on the wall through the four holes on the outside. In addition, the cover can be placed on a floor/table-stand with the VESA holes.

2. Mounting the front plate

Connect the cabling to the display and test the display.

Then press the front plate over the screen and screw the four M3x10 bolts into the four holes at the top and bottom of the screen.

* Cables are not included
